The founder completed her formal education in psychology and gained employment in the field of mental health. She worked with interdisciplinary teams of healthcare professionals, i.e., Medical Directors, Psychologist, Psychiatrist, Private Physicians, Dietitians, Utilization Nurses, Social Workers, DHHS auditors, and other support staff, to provide mental health services for clients with developmental and cognitive disabilities.

Her introduction to the tech industry originated with a position as a Systems Analyst while serving in the U.S. Army. In this role, she installed software and troubleshooted technical problems. She also developed and taught computer classes, amongst other duties assigned. After discharge from military service, she later returned to the tech industry to work in the software development department at the Georgia Institute of Technology in Atlanta.

Sandra Gail Motley – Grant Founder

As a Project Coordinator/Manager, she worked with diverse teams of tech professionals, i.e., database administrators, data warehouse specialist, programmers, architect and network specialist, quality assurance analyst, business analyst, change managers, trainers, internal auditors, functional teams, focus groups, and other stakeholders to develop software. In this role, she was responsible for leading and supporting projects that derived from original concepts and ideation written on the back of a napkins, installation and charters, staffing plans, and other standard project management plans, she also developed and managed individual project work task plans, architectural diagrams, business process maps, risk assessments and mitigation plans, and production support plans to support production software. She collaborated teams to support software testing, to develop disaster recovery plans, and required training. She managed multiple, simultaneous projects that varied in scope, complexity, and length. Her professional contributions resulted in 10 years of excellent employment evaluations and rewards.

Georgia Tech funded her training as an IT Software Development Project Manager and other tech related training.
